# DAVID J. BRAUN

## AI Systems Engineer

Portfolio: [dbraun.io](https://dbraun.io)  
[github.com/DavidBraun777](https://github.com/DavidBraun777)  
[linkedin.com/in/david-braun777](https://linkedin.com/in/david-braun777)

AI Systems Engineer with a software, infrastructure, and cybersecurity background, focused on applied AI systems, workflow automation, RAG, data pipelines, and cloud infrastructure. Experienced in AWS deployments, Dockerized applications, CI/CD, REST API integrations, Python automation, and production web delivery. Builds reliable systems that connect messy operational data, business workflows, and human review into measurable, maintainable processes.

### SKILLS

**AI & Machine Learning** Python, LLMs, LangChain, Hugging Face, Agentic Systems, Data Pipelines, Big Data Processing  
**Cloud & Infrastructure** AWS (EC2, S3, RDS, Route 53, Lightsail), Docker, Kubernetes, Terraform, Ansible, CloudFormation  
**Data Engineering** Apache NiFi, Databricks, Automated Workflows  
**DevOps & Automation** GitHub Actions, CI/CD Pipelines  
**Certifications** AWS Cloud Practitioner (2024)

### TECHNICAL EXPERIENCE

#### Founder & Principal Software Engineer

June 2020 – Present

*People's Connection LLC — New Brighton, MN (Remote)*

- Founded and led a software and AI consulting practice that provides custom applications, scalable cloud infrastructure, and AI-enabled workflow automation.
- Designing and implementing **StormIQ**, an AI-powered lead-generation platform integrating telephony workflows, queue orchestration, voice gateway components, and CRM ingestion pipelines to automate lead processing workflows.
- Developing Weather Forge, a large-scale weather data pipeline that ingests and transforms 100K+ raw NOAA/GHCN datasets into structured, analysis-ready formats for downstream workflows.
- Designed, deployed, and maintained a production website for VIFG non-profit using ReactJS + ViteJS, Docker, and AWS Lightsail with automated CI/CD pipelines.
- Implemented complete CI/CD automation with GitHub Actions for seamless updates and high availability.

#### Systems Engineer

November 2024 – February 2025

*U.S. Bank — Minneapolis, MN (Remote)*

- Validated and troubleshooting REST API integrations using Postman, improving request/response reliability, and reducing downstream data inconsistencies.
- Collaborated with cross-functional teams and external vendors to diagnose integration issues and accelerate resolution timelines.

#### Infrastructure Engineer

November 2022 – March 2024

*Securian Financial — St. Paul, MN (Remote)*

- Automated provisioning and configuration of AWS EC2 using Ansible playbooks, significantly improving deployment speed and reliability.
- Utilized AWS services (EC2, S3, RDS) to deploy and manage cloud applications, boosting system performance and availability.
- Built Python automation for internal data processing workflows, reducing manual intervention and improving efficiency by 40%.

#### Cybersecurity Engineer

October 2021 – October 2022

*General Electric Aviation — Cincinnati, OH (Remote)*

- Remediated vulnerabilities in Java and React applications through SAST/DAST scanning and secure coding practices.
- Designed and documented RESTful APIs using Swagger/OpenAPI with OAuth2 and JWT authentication.

### EDUCATION

#### Master's in Artificial Intelligence

Expected December 2026

University of St. Thomas, MN

Relevant Coursework: Cloud Computing, Data Lakes & Advanced Analytics, Conversational AI, MLOps, Artificial Intelligence

#### Bachelor of Science in Computer Science, Mathematics & Physics

May 2020

Augsburg University, Minneapolis, MN
